

MIL-51 Portable Elevation kit

#BU00012

Quick Deployment Tower System - 5 Metre

The Bushcomm Portable Elevation Kit is not an antenna but a lightweight, transportable pole construction kit for use as a temporary 5m tower solution in the field.

Not recommended as a permanent base station setup, this is a light weight option that comes complete in an easy to carry and highly portable package.

The kit comes complete with all necessary tools for installation making it a quick and easy solution to temporary, portable HF tower needs.
