

SWC-100E HF ANTENNA

HF BROADBAND CENTRE-FED DIPOLE
1.8 - 30MHz

The SWC-100E is a commercial grade single wire broadband dipole antenna designed for base station or semi portable use.

The original SWC's that were first made over a decade ago are still going strong and have continually been improved and refined to ensure higher quality and durability than ever before.

The SWC-100E is 60m long, however, where space is limited, the SWC-100E can be set up as an inverted "V" from either of the two sets of mounting points. At a mast height of 10m, this setup will need an average footprint of only 55m .

As with the majority of Bushcomm antennas the SWC-100E can be adapted to suit many different installation configurations. It can be suspended horizontally, as an inverted Vee or even as a "Sloper" antenna

Being a *true broadband* antenna, the SWC-100E covers the frequency range of 1.8-30MHz **without the need for a tuner or coupler.**
