

SWE-100P MKII HF Broadband Antenna
Single Wire End Fed Dipole 2.0-30MHz

The SWE-100P is a portable single wire end fed HF broad- band antenna system designed for quick deployment casual use. It has a frequency range of 2-30MHz *without the need for a tuner.*

The "Easy To Erect" SWE-100P is an efficient broadband antenna. One side of the balun goes to earth and the other is elevated above the ground.

The SWE is available in two models:

1. The **SWE-100P MkII** is a SWE-100 antenna variant employing ultra flexible stainless steel wire as a radiating element. This system is supplied with a quick deployment kit to suit portable & temporary applications. Accessories such as a carry satchel, 5M coaxial cable, tethering cord & earth stake are all included.
2. The bare **SWE-100 MKII** antenna only, generally used for a permanent and base station installations. Information on the SWE-100 can be found on our Brochure Library Page.

SPECIAL FEATURES

- 2.0 - 30 MHz
- 60W (125W PEP)
- No Tuner Required
- 24 metres long
- Ultra-Flex s/steel wire and fittings
- UV resistant Balun /load boxes
- Easy Installation (instructions provided)

SWE-100P 24 metre single wire end fed HF broadband antenna with quick deployment accessories.

SPECIFICATION

ELECTRICAL

Frequency Range	2-30MHz
Power Rating:	125W PEP 60W continuous

MECHANICAL

Length	32M Overall, 24M radiating Element & 8M counterpoise
Packed weight	1.6Kg

As an emergency antenna, the SWE-100P can be deployed in several configurations
