## MIL-2 Tactical Portable HF Broadband Dipole

## 125W PEP / 50W Digital Voice/Data Modes

**250W Model MIL-2H also available**

Bushcomm's tactical HF Antennas are lightweight and uncompromising, ensuring compatibility with the world's most popular military transceivers.

Designed for quick deployment in Challanging conditions, the Tactical MIL-2 Broadband Dipole Antenna incorporates an advanced balanced loading design to provide controlled impedance across the HF band.

This removes the need for an antenna tuner, and allows operation with frequency agile/frequency hopping communications modes.

This 125 W model is suitable for operation of 50W Digital Voice \& Data enabled transceivers.

Unpacked Tactical MIL-2 Broadband Dipole

Heavy Duty Load

High Impact UV Stablized Nylon Balun housing with recessed coaxial strain relief point

The versatility of this antenna is such that it can be used in a number of configurations, depending on structures available for elevation - See below.

## Product Brief

| SPECIFICATION |  |
| :--- | :--- |
| ELECTRICAL |  |
| Frequency Range | $2.0-30 \mathrm{MHz}$ (Usable VSWR) |
| Maximum power rating | MIL-2 (BU01066) - 125 w PEP / 50W Digital voice \& data modes |
| Impedance | 50 ohm |
| MECHANICAL |  |
| Material | Kevlar core, copper braid, pvc sheath, UV Stablized Re-inforced Nylon housings |
| Length | 48 m |
| Weight | 1.2 kg |
| Packed size | $37 \mathrm{~cm} \times 18 \mathrm{~cm} \times 5 \mathrm{~cm}$ |
| Connector | $\mathrm{SO} 239-$ Other RF terminations available |

## SPECIAL FEATURES

- $\quad 2.0-30 \mathrm{MHz}$ frequency range
- True Broadband Design - No tuner required
- Light weight and packs away for easy transport
- Tough, durable, perfect for outdoor environments
- Flexible arrangements for deployment depending on environment
- Perfect for frequency agile transmitters
